

SecureKey

STRONGER AUTHENTICATION

The most advanced
authentication for your Web services

What is SecureKey

SecureKey is an advanced multifactorial authentication solution for secure verification of user identity with a randomly generated one-time-password.

Why choose SecureKey

- Highest level of security
- Enables authentication using SMS, mobile authenticator or password generator
- The lowest organization total cost of ownership (TCO)
- Easy for the user
- Easy to operate
- Adaptable to consumer preferences

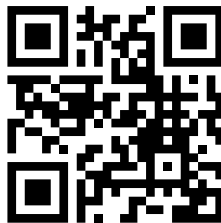

Usability

- portal web access
- access for cloud services
- paid web services
- e-banking
- VPN access
- access to Linux servers

SecureKey provides the highest level of security in a user-friendly way.
